

COURSE OUTLINE

Cold Systems

Self-adhesive, adhesive adhered and liquid roofing solutions

COURSE DESCRIPTION

This course is for installers and contractors who wish to familiarize themselves with some elastomeric bitumen weatherproofing products that are applied without a propane torch.

Contents: The purpose of the course is to provide participants with in-depth knowledge of self-adhesive waterproofing systems and Alsan Flashing waterproofing coating. During this one-day training course, participants will be given the opportunity through hands-on workshops to practice the application techniques for the various systems.

Objectives: Become familiar with the requirements for installing elastomeric membranes without a torch. Become familiar with the techniques for installing Soprema's self-adhesive membranes. Become familiar with Soprema's self-adhesive, adhesive adhered and liquid roofing solutions.

TRAINING CONTENT

ADHESIVES

SELF-ADHESIVE MEMBRANES

BRIEF PRESENTATION OF COLPLY ADHESIVE ADHERED MEMBRANES

BRIEF PRESENTATION OF ALSAN FLASHING SYSTEM

ACCEPTED SUPPORTS

ACCEPTABLE MEMBRANES AND COMPLEMENTARY PRODUCTS

INSTALLATION

WORKSHOPS

- Presentation of the COLPHENE system;
- Base sheet membranes on field surfaces (self-adhesive);
- Reinforcing membranes on metal flashing (self-adhesive);
- Reinforcing membranes on the base sheet (self-adhesive);
- Reinforcing membranes on upstands (self-adhesive);
- Cap sheet membranes on field surfaces (self-adhesive);
- Cap sheet membranes on upstands (self-adhesive and adhesive).
